JOÃO GABRIEL HARTMANN

Fullstack Developer

Parobé – RS – Brazil | +55 51 998771093 | gabrielhartmannqwert@gmail.com
https://www.linkedin.com/in/jghartmann | https://jghartmann.dev/

Summary

Fullstack Developer specializing in Java backend engineering and SecOps, with extensive experience modernizing high-complexity, mission-critical legacy architectures. Proven track record of leading technical projects to improve performance, data protection, and system resilience.

Technologies and Tools

Java | Grails | Spring Boot | JavaScript | ExtJS | React | OracleSQL | PostgreSQL | MySQL | JPA | Hibernate | Git | GitLab | CI/CD | Jenkins | Snyk | Docker | Tomcat | JBoss | Wildfly | Azure | AWS | REST | SOAP | TDD | OOP | DDD

Languages

Portuguese (Native) | English (Advanced) | Spanish (Intermediate)

Experience

Full Stack Developer, Global Hitss (Allocated at Celepar) – São Paulo, SP – Brazil
September 2025 – Present

- Engineer fullstack solutions using **Java and JavaScript** across the complete system lifecycle, delivering **15+ new features and resolving 50+ critical bugs** annually across mission-critical legacy applications.
- Lead structural Java version migration planning and technical discussions, **modernizing legacy applications** to ensure long-term stability and performance.
- Implement SecOps practices and information security guidelines directly into codebases, **boosting system data security compliance by 35%**.
- Manage delivery governance and release tag generation, producing technical documentation for software releases.
- **Provide daily technical leadership** and guidance for a team of 8+ developers to navigate complex legacy tech constraints.

Fullstack Developer, ZG Soluções – Goiânia, GO – Brazil
March 2024 – November 2024

- Developed scalable fullstack solutions using Java (Spring Boot, Grails, Groovy) and JavaScript (ExtJS) for national hospital revenue **systems serving 50+ healthcare facilities**.
- Architected and integrated **20+ secure RESTful APIs** to automate hospital service integrations and data collection pipelines.
- Built **custom web crawlers to extract and process data** from 15+ public and private sources.
- Collaborated in **agile teams delivering continuous deployments** and robust solutions across 5+ mission-critical healthcare environments.

Fullstack Developer, Insoft4 – Sapiranga, RS – Brazil
January 2019 – January 2024

- Built fullstack applications using **Java** (Spring Boot, Grails, Groovy) and **JavaScript** (ExtJS) for corporate access control **systems used by 50,000+ daily active users**.
- Standardized software development processes and **conducted internal workshops** on best practices, version control, and code quality.
- **Spearheaded system architecture modernization** and upgraded core Java and JavaScript frameworks across 8+ core modules, **reducing technical debt by 80%**.
- **Mentored and aligned 4+ developers** to elevate team technical standards, code quality, and delivery speed.

Education

UNISINOS, Campus São Leopoldo – São Leopoldo, RS – Brazil
2019 – 2025

Technologist Degree in Information Security

- Certifications obtained during the program:
  - Computer Network Support Professional
  - Computer Systems Security Analyst
  - Information Security Manager
- Final Project: Developed an automated identity reconstruction tool for Brazilian citizens using publicly available data via **Open Source Intelligence** (OSINT) and **Information Extraction** (IE) techniques, correlating structured entities **across 1,000+ web data points**.

Federal Institute of Education, Science and Technology (IFSUL), Campus Sapiranga – Sapiranga, RS – Brazil
2015 – 2018

High School Diploma with Integrated Technical Program in Information Technology

- **Teaching Assistant** for Programming Logic (2015)
- Champion at RoboSapiens, Programming Competition Category (2016)
- Two-time Champion at RoboSapiens, Programming Competition Category (2017)
- Public Speaking and Expression Workshop (May – June 2017)
- UFRGS Mundi 2017, Model United Nations Simulation for High School Students (October 2017)
- **Three-time Champion at RoboSapiens**, Programming Competition Category (2018)
